Cyber security support for small to medium sized businesses in the South West

If you are involved in running a small to medium sized business, a charity, a public sector body or a local community group, and you are concerned about the security of your IT systems or website, then we would like to inform you about the South West's Cyber Resilience Centre.

Please see here - [Home | Cyber Resilience Centre for the South West (swcrc.co.uk)](https://www.swcrc.co.uk)

The SW CRC is a not-for-profit organisation and exists to help South-West based small to medium sized businesses, organisations, charities, voluntary groups, and public sector bodies, with their cyber security.

Much of what is on offer from the CRC is free and you have the option to sign up with them.

Please consider sharing this information with others.

Thank you.
